WALKER

## Self-Mounting Unit

Available as permanent remote-operated unit with hood harness or as a completely removable self-mounted unit.

Fig. 1a  
Frontal View

The Windshield Umbrella is a safety device designed to yield the maximum visibility in poor weather conditions.

In inclement weather (rain, hail, sleet, etc.) the unit protrudes from the top of any vehicle to serve as a shield and drainage device. It is wind-resistant and can be retracted or removed for easy storage.

(Manufacturing Specifications)

Sleeve / Shield: Lightweight, fibrous polymer composites reinforced with durable steel frame tested for shearing strength.

Brackets: Non-oxidizing alloy
